

MINI CHALLENGE

2019 COOPER CLASS.

The Cooper Class is the ultimate in low budget MINI racing, whilst still retaining the great exposure, top circuits, spare parts service, hospitality and internet TV coverage all of which are synonymous with the MINI CHALLENGE.

The Cooper car uses the same 1.6lt normally aspirated engine as the Cooper Class, but with the minimum weight increased by 30kg. The regulations allow the use of any single way adjustable damper, to enable cars used on track days to transition to a competitive environment at minimal cost. Treaded tyres and sensible transmission regulations also help to reduce budgets, whilst the specification allows competitors to cost effectively upgrade their cars to Cooper Pro spec after a season or two racing.

The class is best suited to those new to motorsport, with some karting experience, or those who just want ultra-close, fair racing on a high profile stage, but with a low budget.

Cars can be built for as little as £7500* including cost of donor car.

Season Entry - £4,450.00.

6-month instalment plan available for early entries prior to 30/11/2018.

Individual race meeting entries also available.

All prices plus VAT at the prevailing rate.

*This price includes basic level of preparation and may vary dependent on the condition of the donor car and final specification.
